Developments in the fields of education and sports make it necessary to provide data through statistical reports. This statistical yearbook aims to familiarize with the changes in the education and sports system in Albania, development trends and comparison in time series, providing those interested with official data.

This material also serves policymakers in the fields of education, sports as well as all educational and sports institutions to design strategies and reforms.

The statistical yearbook, consistently, uniformly, and solidly with previous editions, contains reflected statistical data on educational institutions, registrations, graduations, teaching staff/academic personnel, as well as data on sports in the Republic of Albania.

Most of the statistical data in this yearbook is presented for a 10-year time series as well as more detailed for the school/academic year 2022-2023.

The information is grouped into three main parts: Pre-University Education, Higher Education, as well as the field of sports. Statistical information presents the situation in the public and private education system, giving the opportunity to make comparisons with different educational indicators. In addition, this information provides general information about the organization of sports in Albania.

The accuracy of the information and the degree of its reliability are important indicators for the design of fair and effective educational and sports policies, which enable, among others, the implementation of the cost-effectiveness principle in the use of financial resources in education and sports.

Rënia e numrit të nxënësve për arsimin bazë shpjegohet me uljen e numrit të lindjeve dhe dukurisë së emigrimit. Ndërsa për arsimin e mesëm ulja e numrit të nxënësve vit pas viti është për efekt të uljes së numrit të lindjeve, por nuk ka ulje të përqindjes të tërheqjes së numrit të nxënësve që vazhdojnë shkollën e mesme pas përfundimit të sistemit 9-vjeçar.

Table 1 shows the total number of students in Pre-University Education in the years 2013 - 2023, also classified according to the structure of the pre-university system in Albania. The decrease in the number of students in basic education is explained by the decrease of births' number and the phenomenon of emigration. In secondary education, the decrease of students' number year after year is a consequence of the decrease of births' number, while there is no decrease in the percentage of the number of students who continue to secondary school after the end of the 9-year system.

Një informacion i plotë mbi numrin e shkollave për sistemin publik dhe privat për serinë kohore 2013-2023 është paraqitur në Tabelën 5.

Në sistemin tonë arsimor funksionojnë shkolla jo-vartëse dhe shkolla vartëse. Çdo shkollë vartëse është në varësi të një shkolle jo-vartëse, gjë që nënkupton se ato përfaqësojnë një institucion shkollor.

A full information on the number of public and private schools for the time series 2013-2023 is presented in Table 5.

In our educational system there are non-dependent schools and dependent schools. Each dependent school is under the control of a non-dependent school, which means they represent a school institution.

Tabela 12 tregon numrin e shkollave të mesme në sistemin publik dhe privat, sipas vendndodhjes. Në sistemin arsimor në Shqipëri ka shkolla të mesme/gjinnaze, që ofrojnë program të përgjithshëm studimi, si dhe shkolla të mesme profesionale që ofrojnë programe studimi të drejtimit tekniko-profesional ose social-kulturorë. Brenda këtyre dy lloj shkollave ekzistojnë edhe shkollat e mesme të bashkuara, kryesisht të drejtimit të përgjithshëm (gjinnaz) të bashkuara me 9-vjeçare, të cilat janë të raportuara dy herë dhe në arsimin bazë dhe në arsimin e mesëm.

Table 12 shows the number of high schools in the public and private system, by location. In the educational system in Albania, there are general high schools/gymnasiums, which offer a general study program, as well as vocational high schools that offer technical-professional or social-cultural study programs. Within these two types of schools, there are also joint secondary schools, mainly of general direction (gymnasium) with 9 years, which reported twice in both basic education and secondary education.

Tabela 20 paraqet pranimet e reja në klasën e parë të arsimit bazë. Pranuar të rinj, për një vit shkollor, nënkupton numrin e nxënësve që regjistrohen për herë të parë në klasë të parë në arsimin bazë.

Duke analizuar në tabelë ndarjen publik/ privat vihet re se në arsimin bazë publik trendi i pranimeve të reja është në zbritje.

Table 20 presents the new admissions in the first grade of basic education. Newly admitted, for a school year, means the number of pupils who register for the first time in the first grade in basic education.

Analyzing the public/private division, it is found that in public basic education, the trend of new admissions is decreasing.
